

Koh Young Helps Veris Manufacturing Deliver Highest Quality to Mission Critical Markets

Atlanta, GA – 07 April 2020 – As a contract manufacturer focused on delivering the highest quality products and service, Veris Manufacturing would not settle for anything but the best inspection solution. They found Koh Young and they have not looked back since.

Koh Young is delighted to release their latest testimonial from Veris Manufacturing, an EMS focused on advanced manufacturing for industries like aviation, military, medical, and space, all with mission critical products and exceptionally high standards. Veris is ITAR approved, NADCAP Electronics, AS9100, and ISO 13485 certified, so its supplier expectations are strict and demanding.

Veris Manufacturing chose the Koh Young Zenith 2 automated optical inspection (AOI) solution to reduce false calls, improve operator confidence, increase throughput, redeploy personnel, and increase data analysis capabilities. With Koh Young, they achieved all those targets.

Vargha Samimi, Quality Engineering Manager at Veris Manufacturing said, "It's been a great experience. I had not worked with Koh Young before, I found out that Koh Young was very stable and the results were very repeatable and consistent, that stood out from other competitors." Vargha added, "we have seen a great increase in our throughput just by using one machine, so I can only see us having more. I'd happily recommend Koh Young to my peers."
