

## Koh Young Offering Insight on Optimizing Final Assembly Inspection during a Free Webinar on February 23, 2021

Atlanta, GA – Koh Young, the industry leader in True3D™ measurement-based inspection solutions, will participate in a free panel discussion on Tuesday, 23 February 2021 at 10:30AM EST. Register today and secure your seat in the virtual event to learn from Koh Young and others how to optimize the box build assembly process.

The box build area within most factories are labor intensive and inefficient. Introducing automatic handling, inspection, and assembly improves throughput, quality, and reliability, while reducing cost.

“The drive to improve factory performance and production quality is not limited to the printed circuit board line,” commented Joel Scutchfield, featured panelist and Director of Sales at Koh Young America. “There are overarching benefits when automated inspection is introduced to final assembly. An AOI, for example, can reduce scrap, minimize inefficiencies, and shrink costs.”

This panel will discuss strategies for optimizing parts of the box build assembly process. Register for the FREE webinar [here](#) or cut and paste (or click) this link [us02web.zoom.us/webinar/register/WN\\_Q4dBZrBiSDq5XsHHLxvKtw](http://us02web.zoom.us/webinar/register/WN_Q4dBZrBiSDq5XsHHLxvKtw). Shortly after the panel has been broadcast, the replay will be available on demand at <http://bit.ly/2JWRGCo>.

If you cannot attend the webinar, you can learn more about Koh Young and its award-winning inspection solutions by visiting its regional website at [kohyoungamerica.com](http://kohyoungamerica.com).

### About Koh Young

Established in 2002, Koh Young pioneered a new market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed new solutions for challenges with Machining Optical Inspection (MOI), Dispensing Process Inspection (DPI), and Semiconductor Packaging Inspection (MEISTER Series), as well as branching out to Medical Robotics for brain surgery (KYMERO). Through its technological innovations, Koh Young has secured thousands of global customers, and maintains the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its sales and support offices in Germany, Japan, Singapore, Penang, China, Brazil, Argentina, Canada, Mexico, and the United States. These local facilities ensure it keeps in close contact with the market, and more importantly, its growing customer base to provide access to a global network of inspection and measurement experts. Learn why so many electronics manufacturers trust Koh Young for reliable inspection at [kohyoung.com](http://kohyoung.com).
