

## Koh Young America Participating at the SMTA Ohio Valley Expo & Tech Forum on 25 August 2021

*Atlanta, Georgia* – In support of the SMTA and its local chapters, Koh Young America will be supporting the Ohio Valley Expo & Tech Forum Wednesday, August 25th at the Holiday Inn in Strongsville, Ohio. Based on its award-winning portfolio of inspection and smart factory solutions, Koh Young will highlight its solder paste inspection (SPI) and automated optical inspection (AOI) processes.

At the SMTA event in Ohio, Isaiah Smith, Regional Sales Manager for Koh Young America will be onsite to discuss how True 3D inspection systems can improve production quality. Over the years, inspection systems have become an integral solution for the electronics manufacturing industry, but not all machines make the grade. For example, component miniaturization poses significant challenges, but true 3D-based systems can overcome the issues and improve yield.

During the event, attendees can discuss how to extract value from SPI, AOI, and other inspection technologies. Isaiah will introduce attendees to True 3D inspection and explain its essential role in manufacturing high quality electronic boards. “With my production background as a Process Engineer at EMS providers in New England and my experience with a leading printer supplier, I am eager to share my unique insight about how SPI can improve manufacturing yields,” said Isaiah. “Many manufacturers simply use SPIs for pass/fail defect review. Few are actually performing data analysis.” Using parametric data from Koh Young inspection systems can help them characterize, optimize, and validate the process. Register today at the at SMTA Ohio Valley chapter website accessed through [www.smta.org](http://www.smta.org).

If you cannot attend either event, you can still learn more about Koh Young and its best-in-class portfolio of True 3D smart factory solutions, powered by AI at [www.kohyoung.com](http://www.kohyoung.com).

### About Koh Young

Established in 2002, Koh Young pioneered the market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed innovative solutions for challenges with Machining Optical Inspection (MOI), Dispensing Process Inspection (DPI), and Semiconductor Packaging Inspection, as well as branching out to Medical Robotics for brain surgery. Through its technological innovations, Koh Young has secured thousands of global customers, and maintains the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its sales and support offices across the world. These facilities ensure it maintains contact with its customer base and provides access to an award-winning network of inspection and measurement experts. Learn why so many electronics manufacturers trust Koh Young for reliable inspection its regional website [www.kohyoungamerica.com](http://www.kohyoungamerica.com).
