

## Koh Young Speaking at the Hybrid eSMART Factory Conference on 22 and 29 September 2021 in Coventry, UK

Atlanta, GA - As a firm believer in the power of a smart factory, Koh Young, the industry leader in True3D™ measurement-based inspection solutions, is a session speaker and Platinum Sponsor at the upcoming eSMART Factory Conference on 22 and 29 September 2021 in Coventry, United Kingdom. The first day is an in-person event with a focus on advanced automation systems, which concludes with a tour of the fully integrated CFX production line at the MTC. That CFX line includes the Koh Young 8030 solder paste inspection (SPI) and Zenith automated optical inspection (AOI) systems, which were the very first inspection systems to achieve the challenging IPC Qualified Product List (QPL) certification. The second day is a virtual event focusing on Industry 4.0, supply chain, and next-generation materials. This annual event brings together leading technologists and engineers who will present, discuss, and debate the future of Industry 4.0 technologies. Register today at [esmartfactory.net](https://esmartfactory.net).

During the virtual event on 29 September at 8:10AM (Eastern Standard Time), Ivan Aduna, MES Software Developer at Koh Young America will speak about creating a smart factory by leveraging the IPC-CFX-2591 Qualified Products List (QPL) machines like those from Koh Young. His presentation will be streamed for global participants, as well as those at the in-person event, and hosted from the world-famous Manufacturing Technology Centre (MTC) in Coventry, United Kingdom.

By leveraging IPC-CFX, Koh Young is helping electronics manufacturers combine its AI-powered inspection solutions with the CFX protocol to realize a smart, integrated factory. "Our machines collect inspection data to improve metrics, increase quality, and lower costs," said Ivan. "We are leading the CFX effort for inspection equipment and are excited to highlight our progress at the eSMART Factory Conference at MTC."

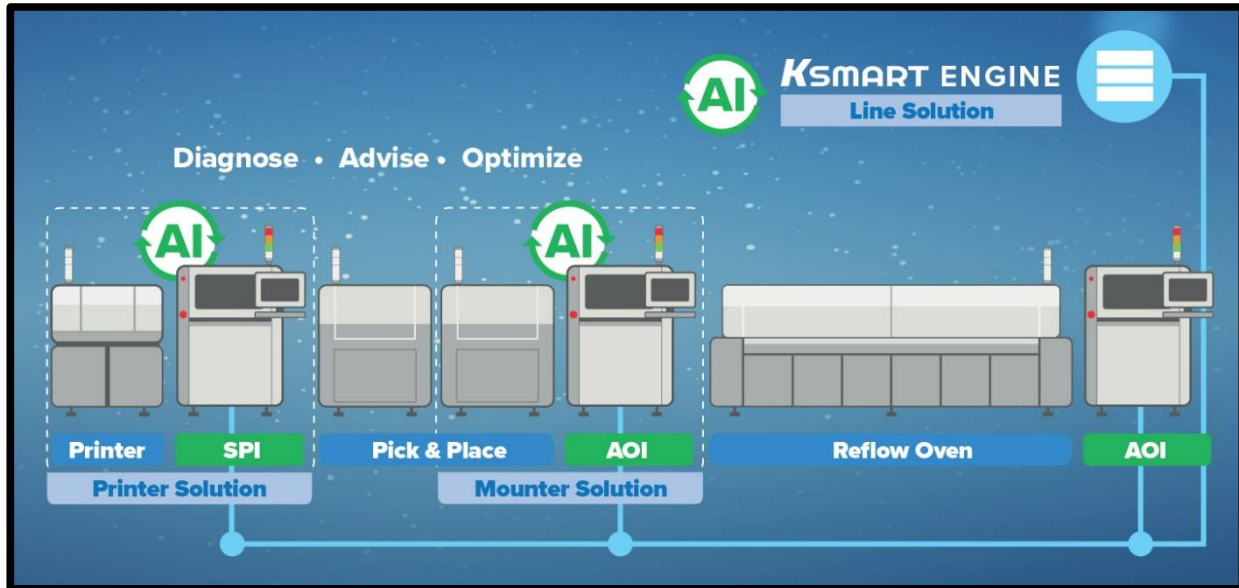

eSMART Factory Conference 2021 brings together the smartest and most informed people in the electronics manufacturing smart factory space to share their knowledge. At the event, you can earn directly from those who are implementing strategies or creating the software, systems, and standards to meet the rising industry challenge for reduced risk, reduced scrap, and reduced machine downtime, providing you with a competitive edge to improve your reliability, yield, and profit.

"As a proud platinum level sponsor for the eSMART Factory again in 2021, we encourage conference attendees to register for the conference – either in-person or virtually", commented Brent Fischthal, Senior Marketing Manager for Koh Young America. "This outstanding event will deliver practical, useful insights to help change the electronics assembly paradigm."

Koh Young was named a Top 10 Most Innovative Smart Factory Solution Provider to Watch and has received multiple industry awards for its KSMART smart factory solutions software. As well as the recognized leader in electronics measurement and inspection. Koh Young continues to expand its capabilities to solve industry challenges and improve the inspection and measurement industry. Register today at [esmartfactory.net](https://esmartfactory.net) and learn why thousands of electronics manufacturers turn to Koh Young Technology for smart factory inspection solutions.

If you cannot attend, you can still learn more about Koh Young and its best-in-class inspection solutions at its regional website [www.kohyoungamerica.com](http://www.kohyoungamerica.com) or at the upcoming SMTA International tradeshow scheduled 01-04 November 2021 in Minneapolis, Minnesota.

###

### About Koh Young

Koh Young, the leading 3D measurement-based inspection equipment and solutions provider, performs an essential role for quality control and process optimization across a growing set of industries including printed circuit board assembly, machining and assembly process manufacturing, semiconductor manufacturing, and various medical fields. In addition to its corporate headquarters in Seoul, Koh Young has sales and support offices in Germany, Japan, Singapore, Penang, China, Brazil, Argentina, Canada, Mexico, and the United States. These local facilities ensure it maintains a close relationship with its growing customer base and provides them with access to a global network of inspection and measurement experts.
