

Koh Young America Hosting a Dispensing Process Inspection Webinar on 29 September 2021 as part of the Repstronics 18th Anniversary Celebration

Atlanta, GA – In cooperation with its Mexico Sales Partner Repstronics, Koh Young, the industry leader in True3D™ measurement-based inspection solutions, will host a webinar delivered in Spanish to introduce the new Neptune C+ and explore how its patented technology solve dispensing inspection challenges. The event is scheduled for 29 September 2021 at 11:00am (GMT-5). Registration is required and can be completed here: <https://repstronics.zohobackstage.com/EXPLOREAPROFUNDIDADLASOPORTUNIDADESDESUSPROCESOS#/?lang=es>.

The Neptune is the industry's first 3D optical inline measurement solution for transparent material inspection. With its integrated flipper, intuitive programming, and machine-learning algorithms, it allows manufacturers to explore the depths of its process using 2D, 3D, and cross-section views to accurately identify defects at full production speed.

Ramon Hernandez, Country Manager for Mexico and South America commented, "During this webinar I will explore the material dispensing market and the challenges with inspection. I am eager to explain how our new inline Neptune C+ solves the issues associated with inspection of wet or dry materials." Register today for the virtual meeting [here](#) or by contacting our partner at www.en.repstronics.com/contact. The webinar is held as part of the 18-year anniversary celebration of Repstronics.

"Repstronics plays an integral role in our continued growth in Mexico and Costa Rica," commented Juan Arango, Managing Director of Koh Young America. "Through their team of highly trained engineers and their three demo centers in key Mexican cities, Repstronics continues to solidify its position as the leading solution provider to the manufacturing industry in the region. We congratulate Repstronics on this milestone anniversary."

For those who cannot attend during the webinar, Koh Young America we will be demonstrating the Neptune C+ in booth 3319 at SMTA International 3-4 November 2021 at the Minneapolis Convention Center in Minnesota. As the Premiere Sponsor for SMTA International, Koh Young America is excited to reconnect and collaborate in-person, while ensuring COVID safety protocols are implemented and upheld for your health and ours. You can register to attend the in-person conference and exposition at smta.org/mpage/smtai. If you cannot attend, you can still learn more about our best-in-class inspection solutions at our regional website www.kohyoungamerica.com.

###

About Koh Young Technology, Inc.

Established in 2002, Koh Young pioneered the market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed innovative solutions for challenges with Machining Optical Inspection (MOI), Dispensing Process Inspection (DPI), and Semiconductor Packaging Inspection (MEISTER Series). Through its technology innovations, Koh Young has secured thousands of global customers, and maintains the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its global sales and support offices in Europe, Asia, and the Americas. These local facilities ensure it keeps in close contact with the market, and more importantly, its growing customer base to provide access to an award-winning network of inspection and measurement experts. Learn why so many manufacturers trust Koh Young for reliable inspection at kohyoung.com.

About Repstronics

Repstronics was founded in 2003 and is celebrating 18 years of growth in 2021. During that time, it has become a leading sales and service channel for innovative manufacturing solutions across Mexico and Central America. Its headquarters in Guadalajara is complemented by sales, demonstration, and training facilities in Monterrey and Ciudad Juarez, as well as its team of engineers located in strategically-positioned cities across the region. With a line card of equipment and products to cover the entire electronics assembly line, Repstronics also delivers solutions for cables and harnesses, assembly and marking, and fiber optics, plus maintenance, repair, and operation (MRO) solutions for a variety of processes. By representing the industry's leading brands, its team of experts and customer focus positions Repstronics as the ideal partner for manufacturers. Learn more at www.repstronics.com.
